

*George Creek*

Oct. 13, 1964  
Yost, Utah

State Engineers Office  
Capitol Building  
Salt Lake City, Utah

Attn: Mr. Lambert

Dear Sir:

This is to inform your office that on Oct. 11, 1964 I was informed that Mr. Joe E. Taylor had water diverted from George Creek.

Upon checking farther, I found this to be correct. A small stream was diverted with the gate locked open so it couldnot be shut off. This action is in complete disregard of the latest order handed down by the court - that all water is to remain in the main channel for stock and culinary use from October 1 to April 1.

Mr. Taylor's action in this case shows his disregard for the discision of the court and makes a mockery of the authority of the State Engineers' Office to administer these discisions.

Sincerely,

*Wallace B. Spencer*  
Wallace B. Spencer  
Water Commissioner
